35.27 lb (16.00 kg) COL96BP6, COL96ESP6

PRINTED IN CHINA

SAFETY TIPS.

WARNING: To reduce the risk of electrical shock, turn off the electricity to the fan at the main fuse box or circuit panel before you begin the fan installation or before servicing the fan or installing accessories.

1. **READ ALL INSTRUCTIONS AND SAFETY INFORMATION CAREFULLY BEFORE INSTALLING YOUR FAN AND SAVE THESE INSTRUCTIONS.**

CAUTION: To avoid personal injury, the use of gloves may be necessary while handling fan parts with sharp edges.

2. Make sure all electrical connections comply with Local Codes or Ordinances, the National Electrical Code, and ANSI/NFPA 70-1999. If you are unfamiliar with electrical wiring or if the house/building wires are different colors than those referred to in the instructions, please use a qualified electrician.
3. Make sure you have a location selected for your fan that allows clear space for the blades to rotate, and at least ten (10) feet (3.05 meters) of clearance between the floor and the fan blade tips. The fan should be mounted so that the tips of the blades are at least thirty (30) inches (76 centimeters) from walls or other upright structures.
4. The outlet box and ceiling support joist used must be securely mounted, and capable of supporting at least 50 pounds (22.68 kilograms). The outlet box must be supported directly by the building structure. Use only CETL (Canada) or ETL (USA) listed outlet boxes marked "FOR FAN SUPPORT."

WARNING: To reduce the risk of fire, electrical shock, or personal injury, mount to the outlet box marked "Acceptable for Fan Support of 22.68 kg (50 lb) or less," and use the mounting screws provided with the outlet box. Most outlet boxes commonly used for the support of lighting fixtures are not acceptable for fan support and may need to be replaced. Consult a qualified electrician if in doubt.

WARNING: To reduce the risk of fire, electrical shock, or personal injury, wire connectors provided with this fan are designed to accept only one 12 gauge house wire and two lead wires from the fan. If your house wire is larger than 12 gauge or there is more than one house wire to connect to the corresponding fan lead wires, consult an electrician for the proper size wire connectors to use.

WARNING: If using this fan in a DAMP location, this fan must be connected to a supply circuit that is protected by a Ground Fault Circuit Interrupter (GFCI) to reduce the risk of personal injury, electrical shock or death.

5. Electrical diagrams are for reference only. Light kits that are not packed with the fan must be CETL (Canada) or ETL (USA) listed and marked suitable for use with the model fan you are installing. Switches must be CETL (Canada) or ETL (USA) general use switches. Refer to the instructions packaged with the light kits and switches for proper assembly.
6. After installation is complete, check that all connections are absolutely secure.
7. After making electrical connections, spliced conductors should be turned upward and pushed carefully up into the outlet box. The wires should be spread apart with the grounded conductor and the equipment-grounding conductor on opposite sides of the outlet box.

WARNING: To reduce the risk of fire or electrical shock, do not use this fan with any solid state speed control device or control fan speed with a full range dimmer switch. [Using a full range dimmer switch to control fan speed will cause a loud humming noise from fan.] (**Note:** This fan is suitable for use with remote control approved for DAMP locations.)

8. Do not operate the reverse switch until the fan has come to a complete stop. [**Note:** If using remote control with reverse capability, reverse fan blade direction *only* when on LOW speed.]
9. Do not insert anything between the fan blades while they are rotating.

WARNING: To reduce the risk of personal injury, do not bend the blade arms during assembly or after installation. Do not insert objects into the path of the blades.

WARNING: To avoid personal injury or damage to the fan and other items, be cautious when working around or cleaning the fan.

10. Do not use water or detergents when cleaning the fan or fan blades. A dry dust cloth or lightly dampened cloth will be suitable for most cleaning.

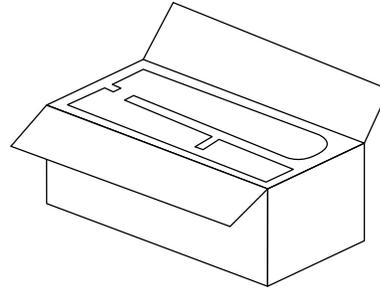

WARNING: To reduce the risk of personal injury, use **only** parts provided with this fan. **The use of parts OTHER than those provided with this fan will void the warranty.**

NOTE: The important safety precautions and instructions appearing in the manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense and caution are necessary factors in the installation and operation of this fan.

1. Unpacking Your Fan.

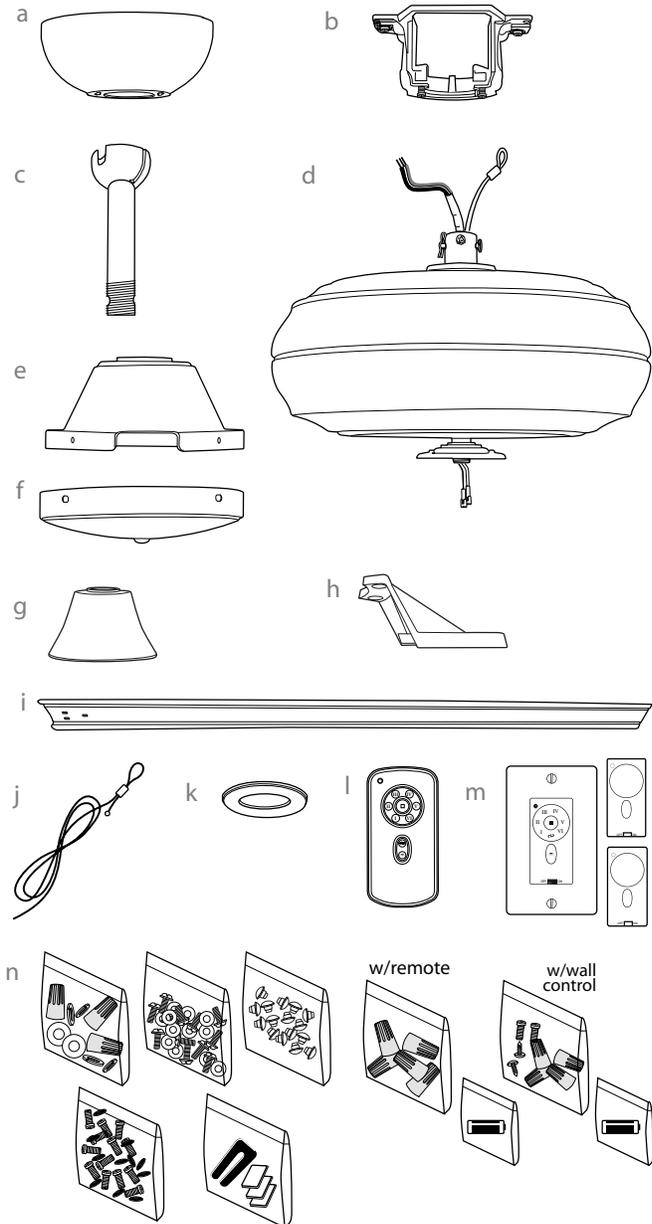

Carefully open the packaging. Remove items from Styrofoam inserts. Remove motor housing and place on carpet or Styrofoam to avoid damage to finish. Do not discard fan carton or Styrofoam inserts should this fan need to be returned for repairs.

Check against parts inventory that all parts have been included.

2. Parts Inventory.

- a. canopy. 1 piece
- b. hanging bracket. 1 piece
- c. downrod and hanging ball. 1 piece
- d. motor housing. 1 piece
- e. switch housing plate. 1 piece
- f. switch housing cap. 1 piece
- g. yoke cover. 1 piece
- h. blade arm. 6 pieces
- i. blade. 6 pieces
- j. safety cable (already attached to motor). 1 piece
- k. canopy cover (in hardware pack). 1 piece
- l. remote control transmitter. 1 piece
- m. wall control, plate and decor covers. 5 separate pieces
- n. hardware packs

⚠ IMPORTANT REMINDER: You must use the parts provided with this fan for proper installation and safety. **⚠**

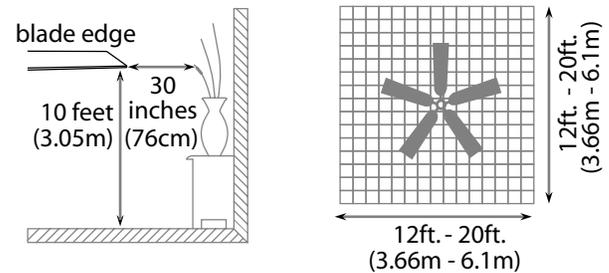

3. Installation Preparation.

To prevent personal injury and damage, ensure that the hanging location allows the blades a clearance of 10 feet (3.05m) from the floor and 30in. (76cm) from any wall or obstruction. This fan is suitable for room sizes up to 400 square feet (37.2 square meters).

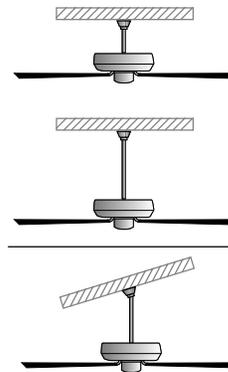

This fan can be mounted with a **downrod** on a regular (no-slope) or vaulted ceiling. The hanging length can be extended by purchasing a longer downrod (0.5in./1.27cm diameter). Other installation, such as **flushmount**, is not available for this fan.

Installation requires these tools:

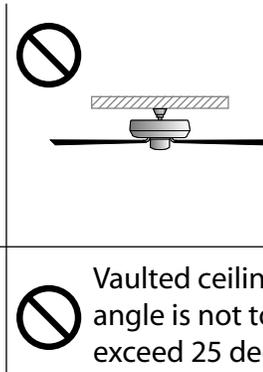

Phillips screwdriver, flathead screwdriver, adjustable pliers or wrench, stepladder, wire cutters, and rated electrical tape

downrod installation

flushmount installation

Vaulted ceiling angle is not to exceed 25 degrees.

4. Hanging Bracket Installation.

Turn off circuit breakers to current fixture from breaker panel and be sure operating light switch is turned to the OFF position.

WARNING: Failure to disconnect power supply prior to installation may result in serious injury.

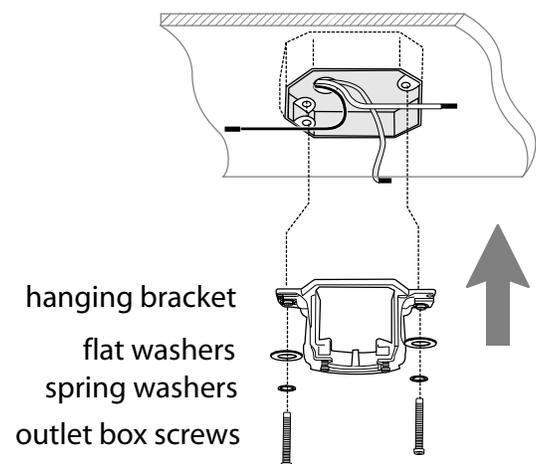

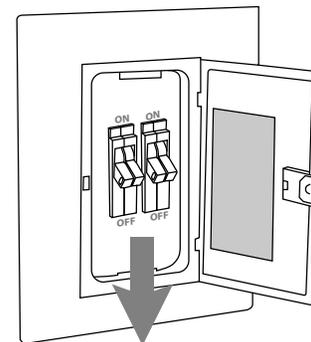

Remove existing fixture.

WARNING: WARNING: To reduce the risk of fire, electric shock, or personal injury, mount to outlet box marked "Acceptable for Fan Support of 22.68 kg (50lbs.) or Less" and use mounting screws provided with the outlet box. Most outlet boxes commonly used for the support of lighting fixtures are not acceptable for fan support and may need to be replaced. Consult a qualified electrician if in doubt. When using an existing outlet box, be sure the outlet box is securely attached to the building structure and can support the full weight of the fan. Ensure it is clearly marked "Suitable for Fan Support." If not, it must be replaced with an approved outlet box. Failure to do so can result in serious injury.

CAUTION: Be sure outlet box is grounded and that a ground wire (**GREEN** or bare) is present.

Install hanging bracket to outlet box using original screws, spring washers and flat washers provided with new or original outlet box.* If installing on a vaulted ceiling, face opening of hanging bracket towards high point of ceiling. Arrange electrical wiring around the back of the hanging bracket and away from the bracket opening.

***Note:** It is very important that you use the proper hardware when installing the hanging bracket as this will support the fan.

5. Fan Assembly.

If you wish to extend the hanging length of your fan, you must remove the hanging ball from the downrod provided to use with an extended downrod (sold separately). [If you wish to use the downrod provided, please proceed to instructions following the dotted line below.]

To remove hanging ball, loosen set screw on hanging ball, lower hanging ball and remove stop pin. Slide hanging ball off the original downrod, A, and slide it down the longer downrod, B (the top of the downrod should be noted as having a set screw hole; use this hole when setting the set screw). Insert stop pin into top of longer downrod and raise hanging ball. Be sure stop pin aligns with slots on the inside of the hanging ball. Tighten set screw securely. (**diagram 1**)

Remove blade arm screws and lock washers from underside of motor in order to remove blue motor stabilization plate. Blue motor stabilization plate may be discarded once removed. (**diagram 2**)

Tip: To prepare for threading electrical wires through downrod, apply a small piece of electrical tape to the ends of the electrical wires--this will keep the wires together when threading them through the downrod.

Locate canopy cover in hardware pack. Loosen yoke set screws and nuts at top of motor housing. Remove pin and clip from motor housing yoke. Slide downrod through canopy, canopy cover and yoke cover. [**Note:** Canopy cover must be turned with shiny side toward the motor housing.]

Thread safety cable and electrical wires through downrod and pull extra wire slack from the upper end of the downrod. (**diagram 3**)

Thread downrod into the motor housing yoke until holes for pin and clip in downrod align with holes in yoke--*make sure wires do not get twisted*. Re-insert pin and clip that were previously removed. Tighten yoke set screws and nuts securely. Lower yoke cover to motor housing.

["Fan Assembly" continued on next page.]

NOTE: The important safety precautions and instructions appearing in the manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense and caution are necessary factors in the installation and operation of this fan.

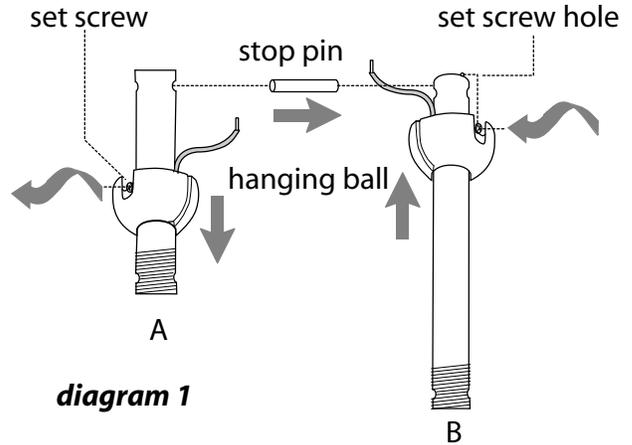

diagram 1

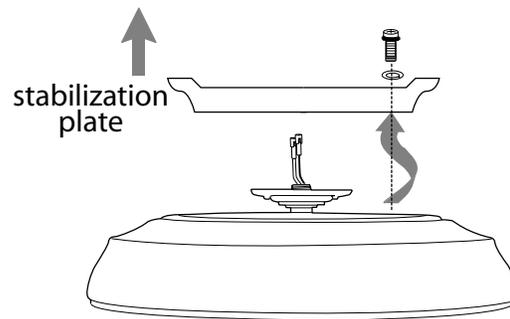

diagram 2

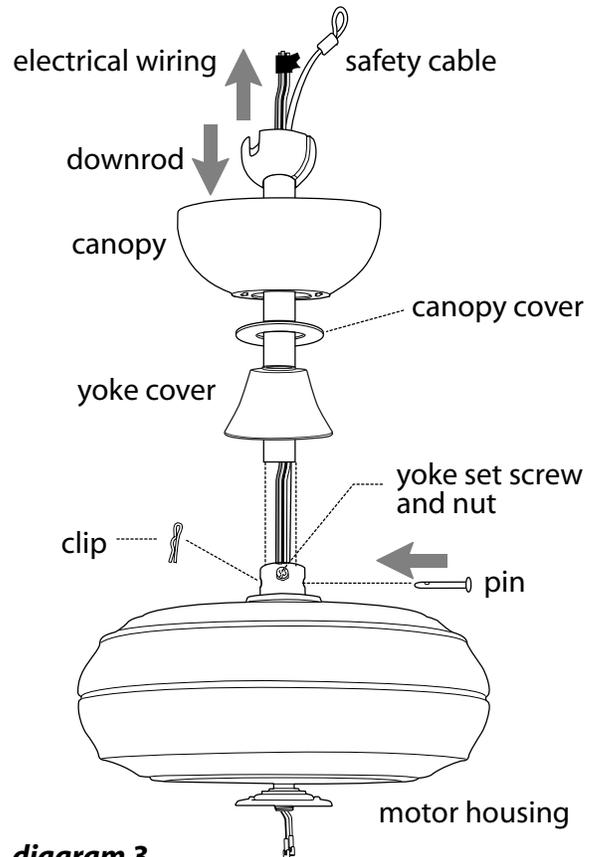

diagram 3

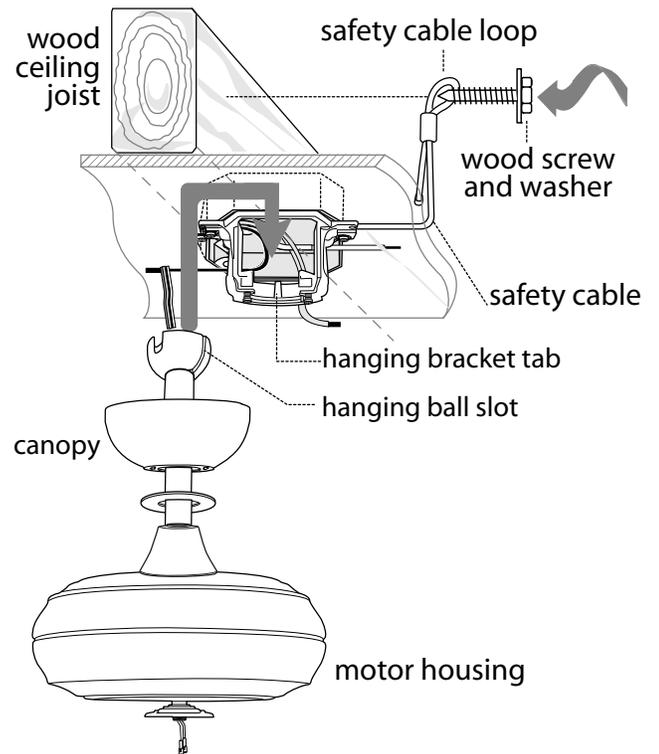

5. Fan Assembly. (cont.)

With the hanging bracket secured to the outlet box and able to support the fan, you are now ready to hang your fan. Grab the fan firmly with two hands. Slide downrod through opening in hanging bracket and let hanging ball rest on the hanging bracket. Turn the hanging ball slot until it lines up with the hanging bracket tab.

WARNING: Failure to align slot in hanging ball with tab in hanging bracket may result in serious injury or death.

Tip: Seek the help of another person to hold the stepladder in place and to help lift the fan up to you once you are set on the ladder.

Find a secure attachment point (wood ceiling joist highly recommended) and secure safety cable. It will be necessary to use a heavy duty wood screw, washer and lock washer (not supplied) with the safety cable loop. If necessary, adjust the loop at the end of the safety cable. The loop at the end of the safety cable should just fit over the threads on the wood screw. Extra cable slack can be left in ceiling area.

6. Wiring.

CAUTION: Be sure outlet box is properly grounded or that a ground wire (**GREEN** or Bare) is present.

Make sure all electrical connections comply with Local Codes or Ordinances and the National Electrical Code. If you are unfamiliar with electrical wiring or if the house/building wires are different colors than those referred to below, please use a qualified electrician.

Note: Excess lead wire length from the fan can be cut to the desired length and then stripped.

WARNING: If using this fan in a **DAMP** location, this fan must be connected to a supply circuit that is protected by a Ground Fault Circuit Interrupter (GFCI) to reduce the risk of personal injury, electrical shock or death.

When fan is secured in place on the hanging bracket, electrical wiring can be made as follows:

Connect **BLACK** wire from fan to **BLACK** wire from ceiling with wire connector provided.

Connect **WHITE** wire from fan to **WHITE** wire from ceiling with wire connector provided.

Connect all **GROUND (GREEN)** wires together from fan to **BARE/GREEN** wire from ceiling with wire connector provided.

Since this fan does not come with a light kit, you will need to cap off the **BLUE** wire with a wire connector (as shown with arrow in diagram). [**Note:** If you elect to purchase a light kit for the fan, the **BLUE** wire from the fan must be connected to the **BLACK** wire from the ceiling instead.]

* Wrap each wire connector separately with electrical tape as an extra safety measure.

IN ORDER TO WIRE WALL CONTROL, remove existing wall switch. Wire the **WALL CONTROL** with wire connectors provided as shown in *diagram at right*.

* Wrap each wire connector separately with electrical tape as an extra safety measure. Gently push wires and taped wire connectors into outlet box.

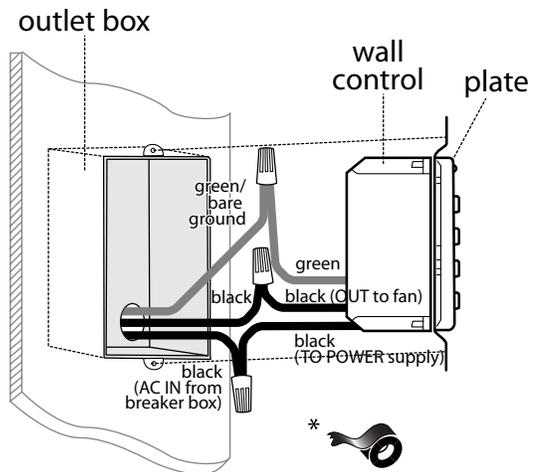

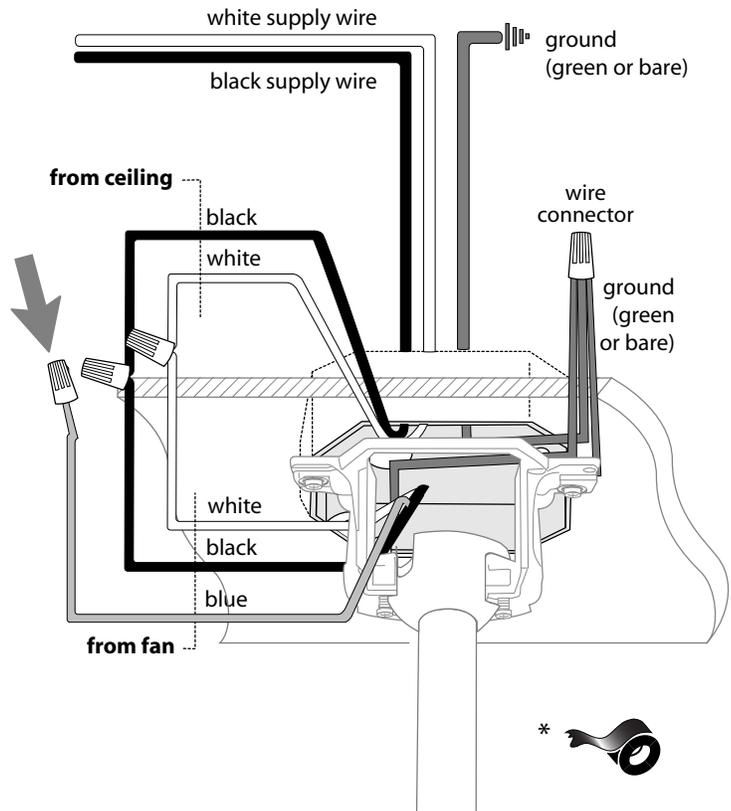

WARNING: CONNECT WIRES IN THE FOLLOWING ORDER ONLY!

WARNING: Turn off circuit breakers to current fixture from breaker panel and be sure switch is turned to the OFF position.

Connect **GREEN** ground wire to ground from house or directly to one of the screws from the outlet box.

Connect one **BLACK** wire from wall control to **BLACK** (hot) lead wire from house. Connect second **BLACK** wire from wall control to **BLACK** load wire to fan.

Attach wall control to outlet box and secure with screws from original wall switch. Attach front plate to wall control using 2 screws provided in the wall control.

(wiring for wall control)

Modifications not approved by the party responsible for compliance could void the user's authority to operate the equipment.

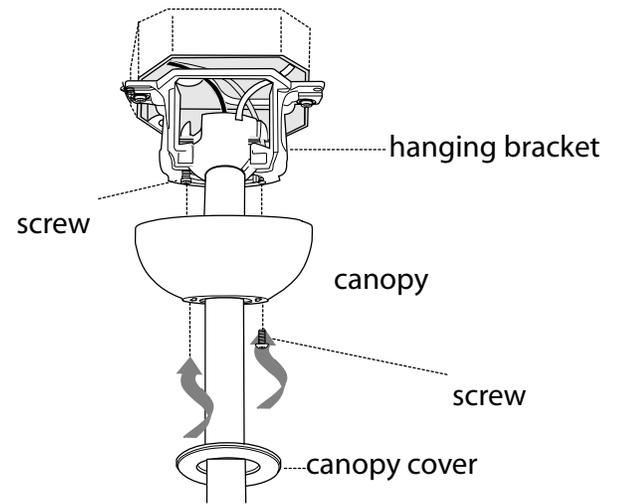

*NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- * Reorient or relocate the receiving antenna.
- * Increase the separation between the equipment and receiver.
- * Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

7. Canopy Assembly.

Locate 2 screws on underside of hanging bracket and remove screw closest to the open end of the hanging bracket. Partially loosen the other screw. Lift canopy to hanging bracket. Place rounded part of slotted hole in canopy over loosened screw in hanging bracket and push up. Twist canopy to lock. Re-insert screw that was removed, and then tighten both screws securely. Slide canopy cover up to canopy, aligning rounded part of slotted holes in canopy cover with screw heads in bottom of canopy. Turn canopy cover to the right (clockwise) until it stops.

8. Blade Assembly.

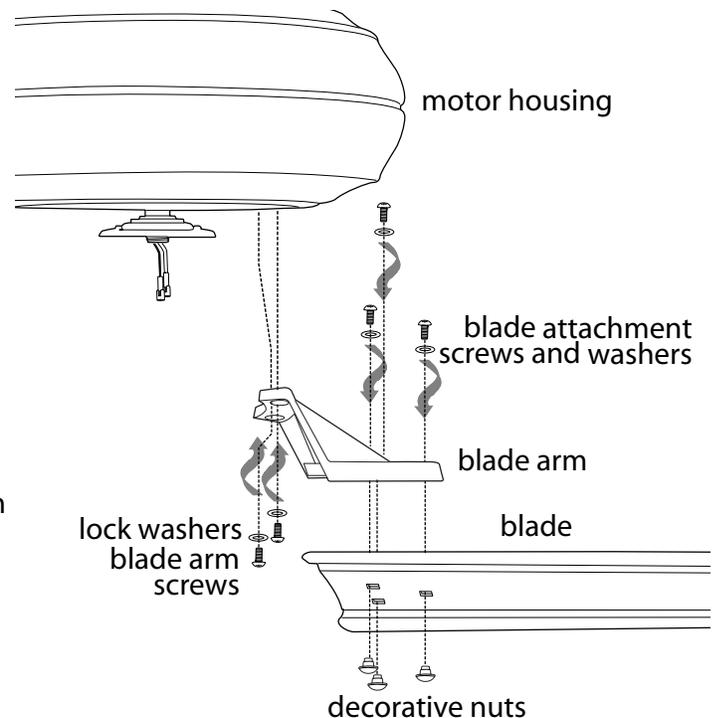

This fan can be used with either 3 or 6 blades.

Time Saver: Washers for blade screws can be set on each blade screw prior to installing blades.

Locate 18 blade attachment screws and washers and 18 decorative nuts in hardware packs. Place blade arm on TOPSIDE of blade, aligning holes in blade arm with holes in blade as shown. [Be sure to note label on blade indicating **THIS SIDE UP** and turn blade so that label faces up.] With fingers, insert 3 blade attachment screws (along with washers) from the TOPSIDE of blade and 3 decorative nuts from UNDERSIDE of blade, making sure to **completely insert** each screw so that the blade arm can be attached correctly. Repeat procedure for remaining blades. Securely tighten screws with Phillips screwdriver.

Locate blade arm screws and lock washers in hardware packs. Align blade arm holes with motor screw holes and attach blade arm with lock washers and blade arm screws. Before securing screws permanently, repeat this procedure with remaining blade arms. Secure all screws.

Note: Tighten blade arm screws twice a year.

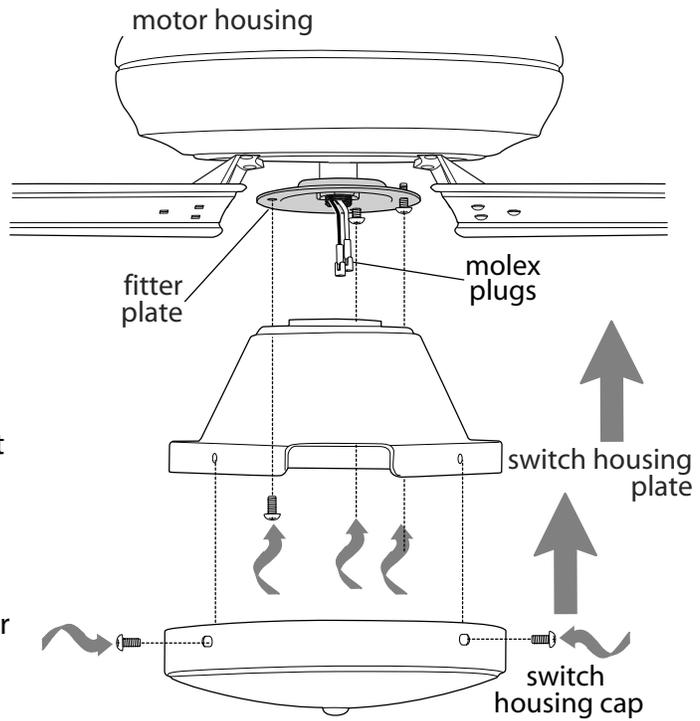

9. Switch Housing Assembly.

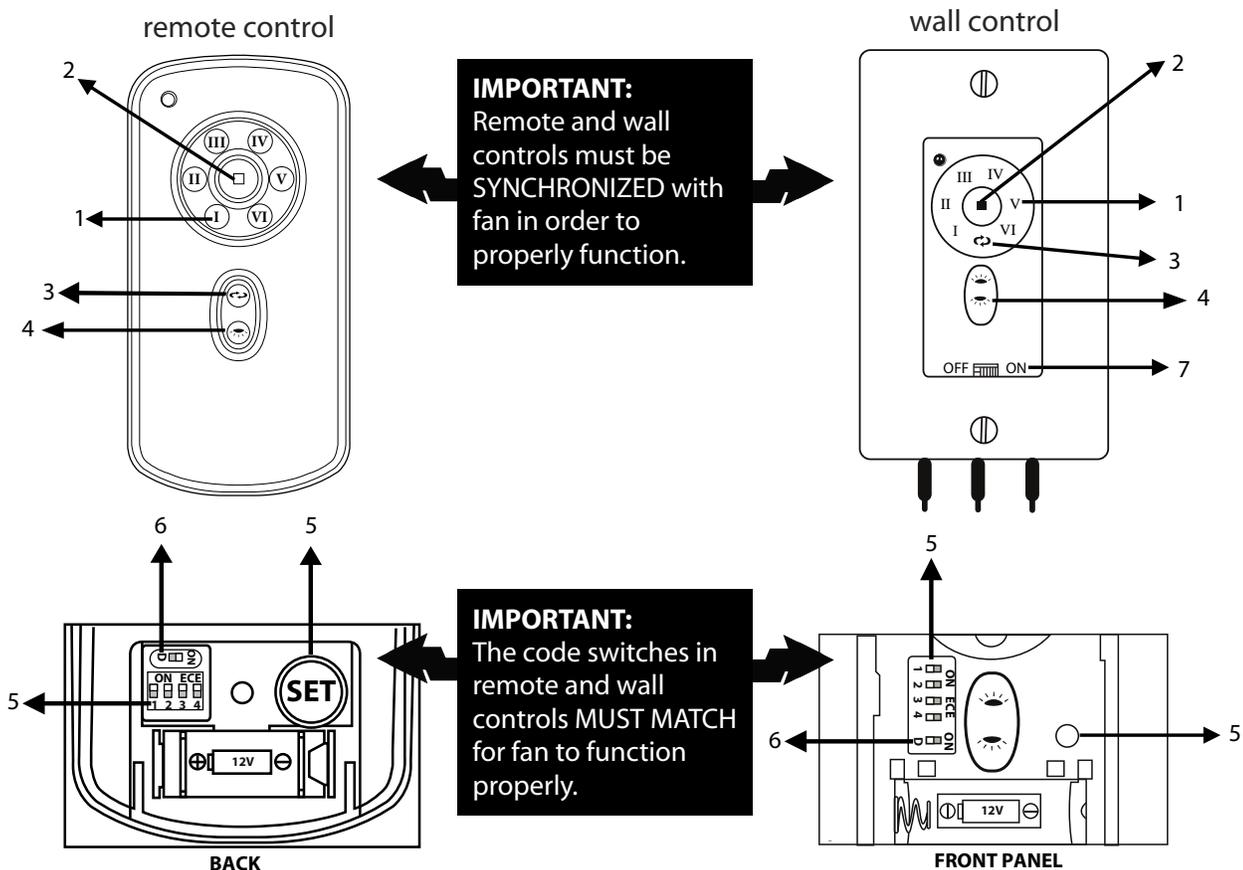

Remove 4 screws from outer edge of switch housing plate (save screws for later use).

Remove 1 screw from fitter plate on underside of motor and partially loosen the other 2 screws. Align slotted holes in center of switch housing plate with loosened screws in fitter plate, allowing molex plugs from motor housing to come through hole in middle of switch housing plate. Twist switch housing plate to lock. Re-insert screw that was removed and secure all 3 screws.

Align holes in switch housing cap with holes in switch housing plate. Re-insert screws that were previously removed and use a Phillips screwdriver to secure all 4 screws.

10. Automated Learning Process./Activating Code.

["Automated Learning Process/Activating Code" continued on next page.]

10. Automated Learning Process./Activating Code. (cont.)

Remove battery cover on back side of remote control transmitter.

Install 12-volt battery (provided) in transmitter and wall control.

IMPORTANT: Store the transmitter away from excess heat or humidity. To prevent damage to transmitter, remove the battery if not used for long periods.

- | | |
|------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Fan SPEED control buttons 1: | Use to control the ceiling fan speed 1-6 |
| Fan OFF button 2: | Use to turn the fan off |
| REVERSE function button 3: | Use to control fan direction |
| LIGHTING button 4: | Use to control down-light and up-light (if applicable) |
| CODE SWITCHES and SET button 5: | With fan power off, arrange CODE SWITCHES to desired code setting. Turn fan power on, press and hold SET button on back of remote control and on wall control for 5 seconds within 60 seconds of powering fan in order to synchronize with fan motor. |
| DIMMING function 6: | Dimming capability is determined by the type of bulbs provided with the fan. If no bulbs are provided, dimming functions will not work. |
| ON/OFF slider switch 7: | OFF position = D On position = ON
[Wall control only] Use to turn wall control on or off |

Replace the battery cover on transmitter. Select decor cover for wall control and press firmly onto front of wall control.

11. Testing Your Fan.

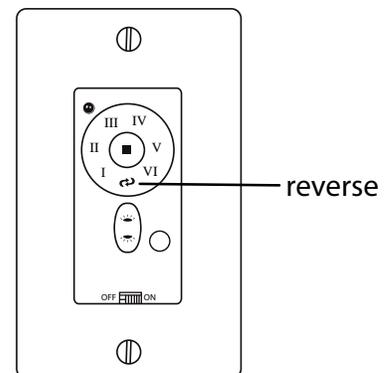

It is recommended that you test fan before finalizing installation. Locate ON/OFF slider switch on wall control and set to the ON position. Test fan speeds with the different fan speed buttons. If the remote control operates all of the functions of the fan, battery has been installed correctly. If the wall and/or remote controls do (does) not operate all of the fan functions, refer to "Troubleshooting" section to solve any issues before contacting Customer Service.

Fan *must* be on LOW *before* setting the fan in reverse. Reverse blade rotation (with ↻ button) to recirculate air depending on the season.. A ceiling fan will allow you to raise your thermostat setting in summer and lower your thermostat setting in winter without feeling a difference in your comfort.

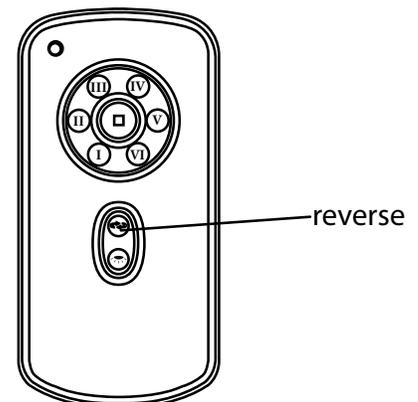

NOTE: If the wall/remote control interferes with other appliances, change code switches on the wall/remote control to another code. If you do change the code, **turn power off first**. After setting the new code on the wall/remote control, go back to instructions regarding the SET button in Section 10 (page 9).

IMPORTANT: Remote and wall controls must be synchronized with fan in order to properly function.

Wall Control

Remote Control

Troubleshooting.

WARNING: Failure to disconnect power supply prior to troubleshooting any wiring issues may result in serious injury.

Problem: Fan fails to operate.

Solutions:

1. Check power to wall switch/wall control.
2. Check to be sure code switches in remote control transmitter and wall control are set properly.
3. Verify that wall control is wired properly.
4. Check to be sure fan is wired properly.
5. Check that red light on remote control transmitter turns on when a button is pressed indicating that the battery is good.
6. Learning process between fan, remote control transmitter and wall control may not have been successful and code was not activated. Turn off power and repeat instructions regarding Code switches and SET button in Section 10 (page 9).

Problem: Fan fails to operate with remote control and/or wall control.

Solutions:

1. Check that red light on remote control transmitter turns on when a button is pressed indicating that the battery is good.
2. Check to be sure code switches in remote control transmitter and wall control are set properly.
3. Learning process between fan, remote control transmitter and wall control may not have been successful and code was not activated. Turn off power and repeat instructions regarding Code switches and SET button in Section 10 (page 9).

Problem: Fan wobbles.

Solutions:

1. Use the balancing kit provided in one of the hardware packs. If no blade balancing kit is provided, please call Customer Support, 1-800-486-4892, to request one.
2. Check to be sure set screw(s) on motor housing yoke is (are) tightened securely.
3. Check to be sure set screw on hanging ball is tightened securely.

Parts Replacement.

For parts and information, please refer to "Parts Inventory" on page 2.

Craftmade/Ellington Customer Support:

1-800-486-4892

www.craftmadebrands.com

Warranty.

CRAFTMADE/ELLINGTON LIFETIME WARRANTY:

CRAFTMADE/ELLINGTON warrants this fan to the original household purchaser for indoor use under the following provisions:

1-YEAR WARRANTY: CRAFTMADE/ELLINGTON will replace or repair any fan which has faulty performance due to a defect in material or workmanship. Contact

Craftmade/Ellington Customer Service at **1-800-486-4892** to arrange for return of fan. Return fan, shipping prepaid, to Craftmade/Ellington. We will repair or ship you a replacement fan, and we will pay the return shipping cost.

5-YEAR WARRANTY: CRAFTMADE/ELLINGTON will repair or replace at no charge to the original purchaser any fan motor that fails to operate satisfactorily when failure results from normal use.

RETURN FAN MOTOR ONLY, shipping prepaid, to Craftmade/Ellington. We will repair or ship purchaser a replacement motor and Craftmade/Ellington will pay the return shipping cost.

6-YEAR to LIFETIME LIMITED WARRANTY:

CRAFTMADE/ELLINGTON will repair the fan, at no charge for labor only to the original purchaser, if the fan motor fails to operate satisfactorily when failure results from normal use. Parts used in the repair will be billed to the purchaser at prevailing prices at time of repair.

The purchaser shall be responsible for all costs incurred in the removal, reinstallation and shipping of the product for repairs.

This warranty does not apply when damage from mechanical, physical, electrical or water abuse results in causing the malfunction. Deterioration of finishes or other parts due to time or exposure to salt air is specifically exempted under this warranty.

Neither Craftmade/Ellington nor the manufacturer will assume any liability resulting from improper installation or use of this product. In no case shall the company be liable for any consequential damages for breach of this, or any other warranty expressed or implied whatsoever. This limitation as to consequential damages shall not apply in states where prohibited.
